FOREING TRADE CO.

It's Time to Go Digital Records...

ORIGINAL DESIGN

Easy to Use
An ergonomic structure suitable for data entry by every employee to record information where it is created.

Simple Screens
Clear screens with clear data that prevent information confusion.

IP Restriction
Extra precautions for security. Determine where to log in.

Unlimited Users
We have no limit on the number of people who can enter the system at the same time.

Multi Language
You can use different languages in one platform.

WHAT IS ERP?
It is a System obtained as a result of gradual review of your business processes, starting from the most important ones and appropriate Software Development stages.

It expresses its integrity. In short, it is the management of all your business processes from a single database.

WHAT DOES IT BRING?
It ensures that;

- The way of doing business is linked to certain procedures and becomes systematic,
- Workflow systematics and system integrity come to the fore rather than people's personal skills.
- Working efficiency to be measured.
- Seeing the costs in detail.
- Making reports quickly and accurately,

WHERE TO START?
- Upper Management will start by knowing what they want.
- Consultant who create link between the company and the software team throughout the implementation.
- Software Select on that s funct onal and easy to use,

WHAT SHOULD IT CONTAIN?
The most problematic departments in SMEs are; Sales, Planning, Purchasing, Stock Control and Production.

A cost accounting must be created that allows material, labor and energy costs to be calculated on an order basis.

In Summary
